

INDUSTRIAL HOSE REELS

QUIK **CORP**®
THE REEL EXPERTS

Here's why Quik Corp[®] are...

AUSTRALIAN DESIGNED, CONSTRUCTED AND TESTED

All Quik Corp's hose reels are constructed and assembled on-site by our highly trained staff. Hose reel construction is performed to industry standards and each unit is rigorously tested before being dispatched.

LIGHTWEIGHT ALUMINIUM CONSTRUCTION

Our reels are manufactured in aluminium and then hard powder coated in the colour of your choice. This makes the reels the lightest and strongest possible.

COMPLETE GUARDING SYSTEM

The reels are completely guarded, making them one of the safest hose reels on the market. Each reel fully complies with AS4024 and ISO12100-1:2003.

MANUAL TO REMOTE REWIND UPGRADEABLE AT ANY TIME

The series starts with a high quality manual hose reel and with three basic steps can be upgraded to offer the benefits of powered, powered self-guided hose feed or fully remote control retractable.

MULTIPLE REWIND POWER OPTIONS

The powered hose reels are available with 12 or 24 Volt High Torque, Low Rev electric motors that are hard wired to the vehicle battery. Units can also be hydraulically powered if required.

ASSISTED REWIND = LESS FATIGUE

Our powered options enable rapid response in times of urgency as well as less fatigue associated with handling long or heavy lengths of hose.

HUGE VARIETY OF HOSE OPTIONS

Quik Corp[®] reels are designed to take a wide variety of hose sizes and lengths. In fact we have a reel to suit almost any hose combination. Give us a call to see what we can do for you.

HIGH GRADE HOSE REEL SWIVEL

Safe working pressure rated up to 3000psi.

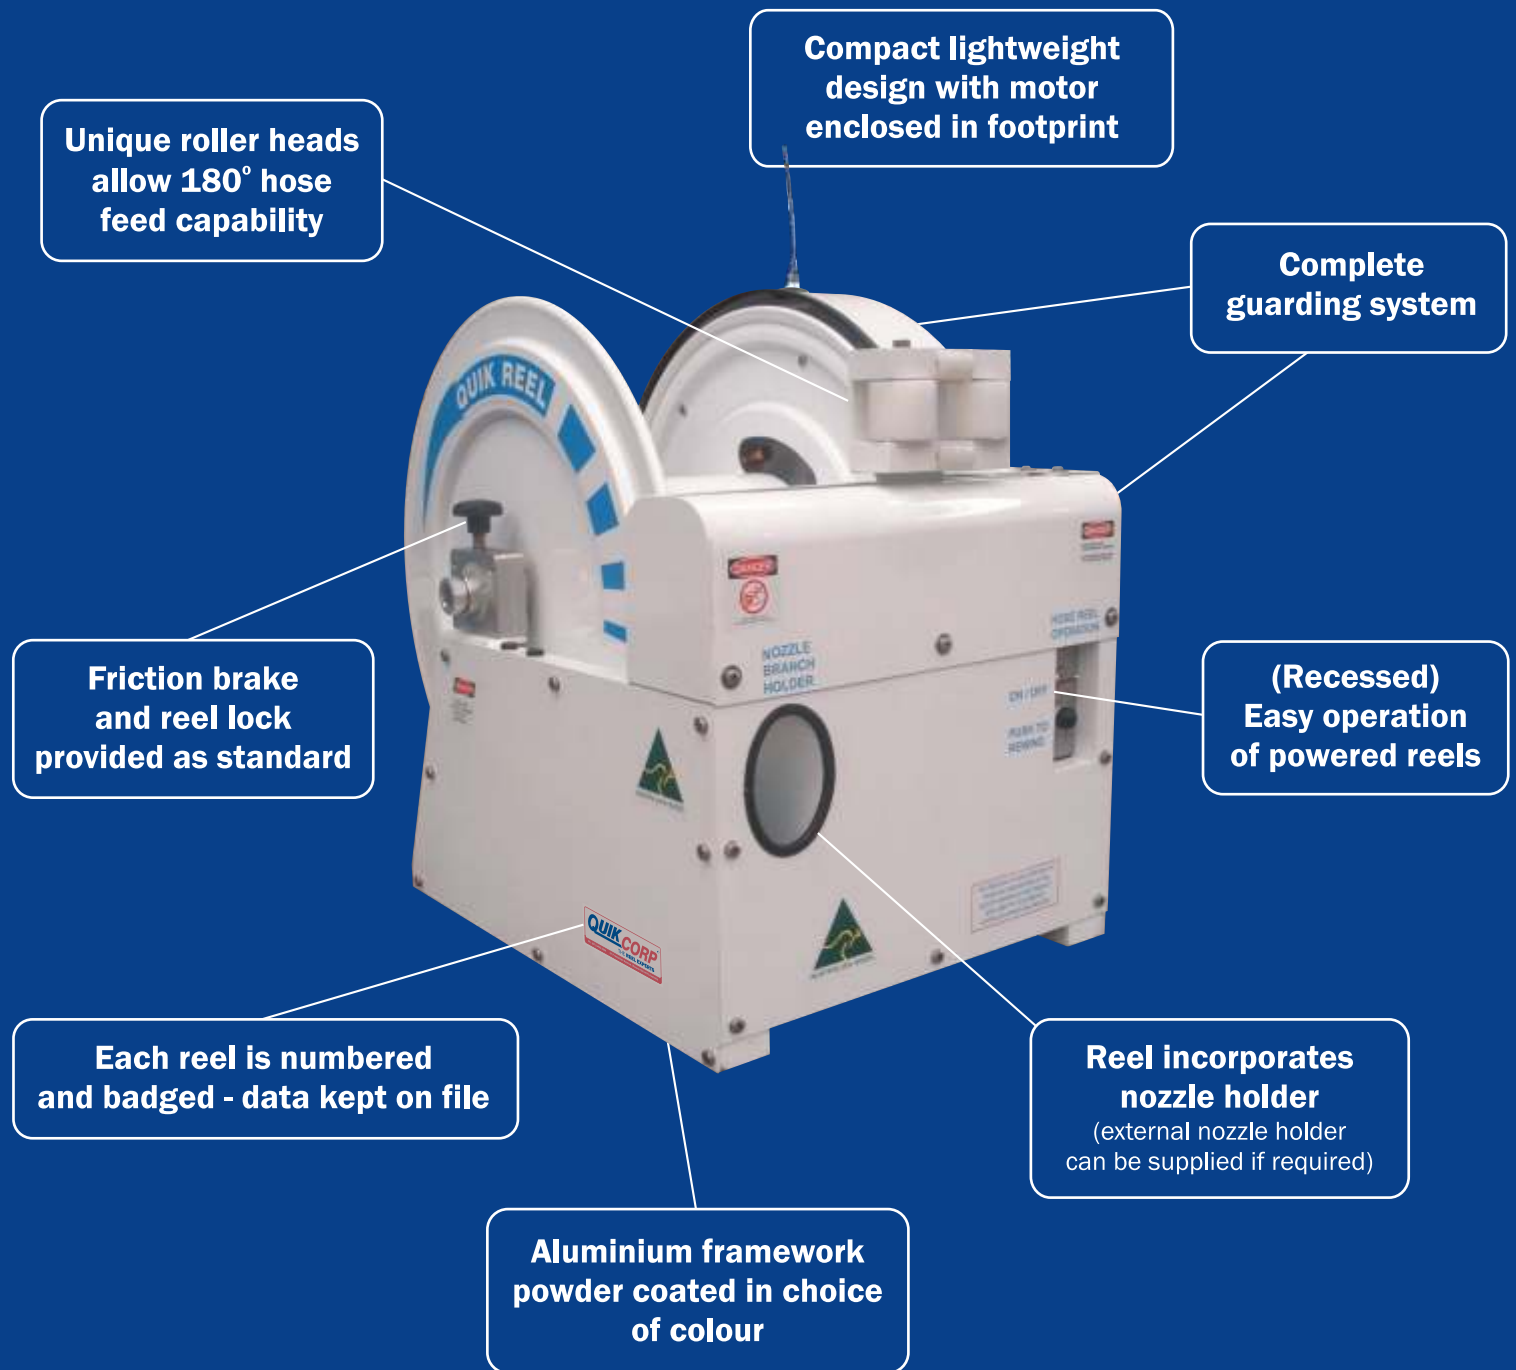

MANUAL OVERRIDE HANDLE

All powered hose reels are fitted with a manual handle as a back up system. Handles are easily stowed on the unit via a locking fixture. Quik Corp[®] also provides a range of options for assisted manual rewind. These included bevel driven systems and 3-1 reduction drives. All of which means you will get the hose on the reel the easiest way possible.

PATENTED AUSTRALIAN DESIGN

Aust Patent 627976, NZ Patent 239868, Aust Patent A-N (Multi-Pump) 2006905253, NZ Patent A-N (Multi-Pump) 561865
